6 General Qualitative Disclosure

6.1 Credit Risks

Credit Risk is the risk of economic loss from the failure of a debtor to perform according to the terms and conditions of a contract or agreement. Credit Risk considered as the main risks charged to capital for the Company due to the Company's proprietary investment.

The Company performs the reasonable due diligence of securities and investments, along with Counterparty Risk Assessment, the Company obtains the appropriate approvals as per the approved authority matrix and the approved limitations, such process has to be in line with the approved investment roadmap.

In order to mitigate the credit risk and the counterparty risks, the Company applies suitable and approved policies and procedures in this regard allowing close monitoring in order to highlight any breaches related, also to consider an immediate correction plan, the Company still doesn't use hedging techniques, as an example of the policies and procedure principles are:

- Consider Short term Murabaha placements as low risk product.
- Perform Counterparty profile Risk Assessment to confirm the credit levels is up to acceptable standards.
- Counterparty Risk Assessments to be conducted on an annual basis.
- Carrying out Stress Testing process to review any unexpected movements in terms of rating, Geo political change, significant down trend in the financial performance semiannually or annually.

6.2 Market Risk

Market Risk is the potential that changes in the market prices of an institution's holdings may have a negative impact on its financial condition. It's arising from positions either explicit or embedded within instruments and can be especially complex and difficult to manage. There are four most common market risk factors (Interest Rate, Foreign Exchange, Equity price, Commodity price). The Company's exposure to market risk as an average position was remain very low during 2019, due to the absent of a trading portfolio and the nature of investment provided by the Company. The current marker risk exposures disclosed arouse from the investments & foreign currency exchange risk charges.

In order to mitigate market risk the Company follow an approved policy and procedure that include investments due diligence, underwriting process, considering the approval levels as per the approved authority matrix that includes the BoD or any other Committee, moreover, applying risk measurement tools such as Sensitivity Analysis and/or Stress Testing where applicable.

6.3 Operational Risk

Operational Risk is inherent within each and every activity or process conducted by the business. Its' widely used definition, as adopted by Basel II regulations: which is "the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events". Operational loss always associated with business activities such as:

- Business Internal Process: it's the risks associated with failures of processes or procedures.
- People Risks: associated with employees and/or with clients.
- System Risks: associated with the use of technology and systems.
- External Event Risks: associated with causes beyond the direct control of the Company.

In order to mitigate the Operational Risk, risk management implementing an approved operational risk policy and procedure subject to continues improvements, the risk management function always emphasizing that each business line is responsible to minimize the operational risk associated with their activities, some of the followed principles are:

- Continues testing of all controls effectiveness.
- Risk Control Self-Assessment "RCSA" and creating the risk register.
- Business Continuity Plan "BCP" testing annually.
- Review all Service Level Agreement's "SLA" annually.
- Developing the risk management reporting.
- Internal Audit functions to independently conduct a Risk Assessment Internal Audit based, and assessing effectiveness of the business controls.

6.4 Liquidity Risk

This risk arises as a result of holding of illiquid assets, asset vs. liability gap, or inaccurate assessments of potential operating liquidity requirements.

In order to mitigate the liquidity risk, the Company monitors the liquidity position regularly, to maintain reasonable level of liquidity availability in order to meet any commitments when it falls due, Moreover, the Company considers short term and low risk investments, evaluate the worst case scenario the Company may face by applying stress testing scenarios, and most importantly is applying close monitoring to the asset and liability management.

The liquidity Statement is prepared in accordance to different time intervals of the expected cash flow arising at the settlement time of both asset and liabilities. Time intervals used as per the CMA Prudential Rules Regulation presented below:

- 1 Day
- From 1 day Up to 1 week
- From 1 week Up to 1 month

- From 1 month Up to 3 month
- From 3 month Up to 6 month
- From 6 month Up to 1 Year
- Over 1 Year
- Non Maturity

6.4.1 Liquidity Risk Quantitative Disclosures

MEFIC has defined liquidity risk indicator as a part of its Risk appetite which they monitor & always maintain adequate Liquidity to meet its day to day obligations and cash outflows. Liquidity coverage Ratio is maintained greater than 110% and for Dec 2019 the LCR was 235 %.

MEFIC also uses benchmark ratio of Liquid Asset / Total Assets to determine the impact the liquidity emergency situation wherein funds from the liquid assets shall be utilized to withstand the liquidity crisis.

Liquidity Risk (Stock Approach)											
Indicators	Values	Inference									
Liquid Assets / Total Assets	20%	This reflects the cushion/comfort level in meeting its short-term liabilities and fixed cost payment									

MEFIC measures the liquidity risk by calculating cash flow mismatches based on the maturity dates relating to all its assets and liabilities as below:-

Liquidity Risk (Cash Flo	Liquidity Risk (Cash Flow Approach)
